# Multicore® disposable automatic biopsy device

**Multicore® disposable automatic biopsy device:** is the latest single use biopsy device, manufactured by **STERYLAB**, which performs the entire biopsy maneuver quickly, fully automatic and with precision.

## Features:

- Versatile, simple to use and reliable, with unique ergonomics for cocking and firing, it represents the “state of the art” among automatic biopsy instruments
- Spring loaded stylet and cannula harvest diagnostic quality specimens with minimal tissue displacement or needle deflection
- Simple to use with unique rapid firing and loadable with just ONE hand, making it ideal for procedures requiring ultrasound guidance
- Two firing buttons
- Available penetration depth 20 mm
