# Palium® Reusable Biopsy device

**Palium® reusable biopsy device:** is an automatic, reusable device equipped with a sequential advancement system with an advancement length of 15-22 mm.

The device is lightweight and the rapid fire action can be activated with one hand only for easy access to tissue samples. A powerful dual spring system allows the user to obtain consistent, high-quality samples. Palium also has a safety button to avoid accidental firing.

This device is compatible exclusively with MDL's Palium® needle with reference code: MGK1xxyy.
