BIOPTIC PROCEDURE

1) Hold the device with the B button facing the operator. Load it by pulling the A button twice with the thumb (once to retract the cannula and once to retract the stylet). Verify that the READY indicator on the back of the device is red (ready).

2) Penetrate to reach the lesion and check correct positioning of the device using ultrasound, CT or magnetic resonance (MR version only)

3) Push the firing button B or press the firing button C

4) Remove the device from the patient

5) Retrieve the specimen, pulling back the cannula, pushing one time the loading button A .
