# Estacore Pro® disposable automatic biopsy device

The **Estacore Pro®** is a fully automatic and disposable biopsy needle mechanism designed for taking solid biopsy samples from various organs and soft tissues, including the prostate, breast, kidney, liver, and lung. This innovative medical device is equipped with a cutter cannula and a stylet featuring a sampling chamber, ensuring precision and ease of use.

## Features:

- **Easy & One-Handed Setup:** The two-stage arming system allows for effortless preparation and operation.
- **Ergonomic Grip:** Designed for comfortable and secure handling during procedures.
- **The Estacore Pro** provides a reliable, efficient, and safe solution for performing biopsy procedures, ensuring high-quality tissue samples with minimal discomfort to patients.
